This property truly has it all from the 4 bedroom 2 bath with nearly 2000 square feet with separate living and family rooms as well as a formal dining room to the beautifully laid out backyard. The kitchen has been updated with granite countertops and there is plenty of counter space. Both bathrooms have been updated with granite counters. In the master bathroom you will find a soaking tub as well as a walk in shower. Out back there is a nice covered patio leading you to the inground gunite pool. There is also a built in bbq and a firepit. The home is located on a corner lot which allows you to have a 2 car attached garage as well as RV parking. Owned solar and new roof in 2024.
